Professional Development Program Overview of Training Options for WYNN & TestTalker

Freedom Scientific, Learning Systems Group considers training one of the most significant aspects of learning how to use our products effectively. The benefits of our products are best exemplified in a thorough step-by-step training process.

Our training is designed to create successful implementation of our products. We have found that Professional Development makes a huge difference in meeting individual students' educational goals.

WYNN TRAINING MODULE – *Updated with WYNN 4 New Features*

LSG has a new WYNN Training Module CD! The multimedia training program is designed to be a self-guided training tool to enable users to successfully use WYNN.

The WYNN training module can be used to introduce new users to WYNN or as a refresher for more experienced WYNN users. Simply clicking on a toolbar tab allows users to go to the individual toolbar training modules. The WYNN Training Module CD is designed so that the user can go into tabbed toolbar sections to learn about or review specific features on each of the toolbars within WYNN. Additionally, we have a new Presentation Demonstration CD that provides a Quick Overview of WYNN. This information is paired with a ten-minute introduction to the product's Basic Features.

GOTOMEETING TRAININGS – *Fun and Easy Training for WYNN and TestTalker*

GoToMeeting allows us to conduct real-time online training of WYNN and TestTalker. All that's required is a high-speed Internet connection and a phone line for the audio. This is a great way to get a live product overview, see new product features, or explore the steps for using a particular function, all without leaving your desk. If you're interested in setting up a GoToMeeting with our staff, just contact your Regional Manager. You'll be surprised how easy, fun, and effective it is.

ONSITE TRAINING

LSG offers instructor led training for WYNN and TestTalker on location at your school or organization. Use our training to teach your teachers, trainers, employees, or yourself how to effectively use our products. LSG offers training at any point in time ... whether it is arranged at the time you purchase product, a few months after you have installed the software, or additional follow-up trainings can be scheduled at your convenience.

DEALER TRAINING

For a list of dealers that conduct training in your area, please contact your Regional Manager.

Learning Systems Group

Professional Development Program Overview of Training Options for WYNN & TestTalker

Freedom Scientific, Learning Systems Group offers Three Customized Levels of Training:

PROFESSIONAL DEVELOPMENT – LEVEL I

Level I training is essential to building a successful implementation of WYNN and TestTalker in the classroom. This introductory training ranges anywhere from *three hours to one day*. Once completed, teachers and administrators will have the basic information to effectively begin using WYNN or TestTalker software.

PROFESSIONAL DEVELOPMENT – LEVEL II

Level II training ranges from *three hours to two days*. This training is designed for individuals who have mastered the “basics” and want to take WYNN and/or TestTalker to the next level. This time is designed to empower teachers to fully utilize the maximum potential of our software with their students. Teachers will learn new instructional study strategies that are integral to the learning process and success of their students. Certified teachers and experts in teaching students with learning disabilities lead the training. The goal of this training is to aid teachers to understand and implement the educational benefits of the features of our products. Training includes information on the foundation of learning and how our software can be integrated into the classroom curriculum to maximize student learning. This training is designed to meet educators’ needs at any stage of development.

“Thank you, for the wonderful training! I really appreciated the tips and the format of the presentation. I also liked the support you offered with training and materials.”
Cindi Dudley, Occupational Therapist and District Assistive Technology Coordinator

PROFESSIONAL DEVELOPMENT – LEVEL III

Level III training offers specialized project/content training. This training offers modular blocks such as: “Becoming Familiar with Using WYNN,” “The Web as a Research Tool” and “Using Word Prediction as a Writing Tool.” These units are designed to help teachers as they learn to implement WYNN and TestTalker into their classroom at specific skill levels. As teachers are learning and using WYNN and/or TestTalker they will have many questions and needs arise. The consulting services allow administrators, teachers, technology coordinators, specialist and directors of labs to have their individual needs met as required.

"Our students use WYNN to read novels, to search the Internet, to do history assignments, to learn vocabulary words, for writing assignments and proofreading. The kids love it because it gives them confidence and allows them to learn independently."

*Frances Rash, High School Computer
Facilitator, South Carolina*
