## Thames Valley School District, Ontario, Canada Wins Huge Government Grant: Purchases WYNN and TestTalker

### **Introduction of WYNN & TestTalker**

Freedom Scientific, Learning Systems Group has been promoting WYNN and TestTalker in Canada to reach more individuals and schools who are searching for assistive technology. Peggy Dalton, Canadian Regional Manager began this campaign by presenting and exhibiting at National Conferences and conducting WYNN and TestTalker Workshops. These efforts are designed to familiarize administrators and educators with our software. Due to WYNN's and TestTalker's easy-to-use interface and powerful features, interest was immediate. Furthermore, our software caught one school district's attention and resulted in a significant order.

### **A Big Win for Everyone**

Planet Micro, a dedicated dealer for LSG, received a major order in August from Thames Valley School District in Ontario, Canada. Thames Valley purchased 400 TestTalker and 161 WYNN Wizards which will be used this coming school year throughout their district. They were able to purchase the software through a generous grant from the Ministry of Education Special Education Grant. The Thames Valley District School Board is one of the largest public boards in Ontario. There are 186 schools serving more than 80,000 elementary and secondary school students. The District covers urban, suburban and rural communities. Thames Valley is also known for its devotion to helping students through their extensive Special Education program.

### **Professional Development Program**

Freedom Scientific, LSG is also committed to providing extensive training for its customers. Therefore, Peggy Dalton will provide three days of Professional Development to teachers in the district to ensure proper implementation of WYNN and TestTalker in their classrooms. The program provides teaching strategies and tips for customizing WYNN and TestTalker to meet individual students' learning styles. The Program also supplies a wealth of support materials including WYNN 3.5 training CD's designed to be a self-guided training tool to enable users to successfully use WYNN independently.

### **Contact Us!**

LSG is pleased to know that WYNN and TestTalker will become part of Thames Valley's teaching tools to assist struggling students.
