

# PAC Mate™ Portable Braille Displays

## ***PAC Mate Portable Braille Displays at a Glance***

- True modular design - attach to your PAC Mate when you're on the go; attach to your PC when you're home or in your office
- Smooth display surface - no seams between cells - provides the comfortable feel of paper
- WHIZWHEELS and programmable hot keys
- Set braille firmness to your preference with built-in VariBraille
- Highly affordable without sacrificing the features you most want and need

### **Access to information via refreshable braille**

Truly the first-of-their-kind, PAC Mate Portable Braille Displays are as versatile as they are affordable. Featuring a simple platform, the 20-cell and 40-cell refreshable braille units attach securely to the PAC Mate Omni™ to form one unit - or connect to your computer with a USB cable.

### **Navigation extras plus customizable braille firmness**

A unique seamless design between braille cells makes the braille display feel like paper. With a pair of four-way WHIZWHEELS® for rapid navigation and dual-purpose cursor routing buttons, you can quickly and accurately obtain the information you need.

Built-in VariBraille lets you set the braille firmness to your preference, and programmable hot keys let you personalize your navigation. Ten dual-purpose hot keys in the center and dual cursor router buttons in the background make finding shortcuts to your applications and functions easy.

### **The features you need at the price you want**

PAC Mate Portable Braille Displays address major accessibility issues such as comfort, simplicity, and durability, whether they are used with the PAC Mate Omni or a PC. They also are compatible with JAWS for Windows®. Compare with other braille displays, and see if

you don't agree that these represent the best value cell for cell on the market today.

## Modular braille!

At any time, you can add a 20-cell or 40-cell PAC Mate Portable Braille Display to your basic voice-only PAC Mate Omni. Use the braille display separately with your PC and JAWS.

*Shown from top to bottom: PAC Mate Omni QX400 (QWERTY-style keyboard) and detached PAC Mate 20 Portable Braille Display; PAC Mate Omni QX400 with attached PAC Mate 20 Portable Braille Display; and PAC Mate Omni BX400 (Perkins-style keyboard) with attached PAC Mate 40 Portable Braille Display.*
