StreetTalk™ 2.0

GPS Solution for the PAC Mate

PAC Mate users can enjoy new confidence and have fun while traveling near and far with the **StreetTalk** accessible GPS (Global Positioning Satellite) solution. Paired with a GPS receiver, **StreetTalk** is a route-savvy travel companion and real-time exploration guide. Take it for a ride, vacation, business trip or local jaunt, and keep oriented to your location. Discover new places to explore. Design a custom trip on the go. Even route an entire trip with interesting stops before departing.

In a car or on foot, StreetTalk does the work Based on mainstream GPS technology for Pocket PCs, **StreetTalk** makes NAVTEQ maps accessible for the visually impaired, to create an affordable and feature-rich orientation solution. **StreetTalk** keeps you informed about your surroundings through braille or speech announcements. Ask it where you are, and get the nearest address or your latitude and longitude. Tell it where you want to go, and get turn-by-turn directions to get there by vehicle or

as a pedestrian. On the way, have it announce what's around you and call out your next turn.

Be the explorer. Control and design your own trip

StreetTalk is more than a hard-working direction-finder. It's your ticket to discovery. Leisurely explore like you've never been able to before, with confidence that you can find your way back. Use your time in a taxi, bus or walking to identify Points of Interest along your way like restaurants, public buildings, hospitals, convention centers, and shopping. With **StreetTalk**, you have access to millions of Points of Interest. Let **StreetTalk** announce the next turn and even the distance to surrounding points of interest. Change your destination on the fly for spontaneous side trips. **StreetTalk** tells you when you're too far off course and automatically recalculates the best way to get you to where you want to go. **StreetTalk** can quickly plot a detour to avoid a segment you don't want to take.

StreetTalk is essential for long-distance travel and unfamiliar local zones. It also can be a valuable addition to your most routine trips. Set **StreetTalk** to explore routes you commonly

StreetTalk™ 2.0

take, and let it announce businesses, schools, service locations, and entertainment spots. You might discover some great places you never realized were there! You can even save your best trips and recall them by name when you want the route again. Better yet, become the seasoned traveler, and share your routes with other users.

Take a virtual tour without leaving home

Put **StreetTalk** in planning mode, and plot your route without leaving your home or office. Load maps from several states or countries on a single CompactFlash® card. Locate lodging, ATMs, airports, metro stations, grocery stores, libraries, tourist attractions, and more. Get phone numbers. Create and save multiple route plans for places you need to find once you arrive. Review your route turn-by-turn, then save, print, emboss, or beam it, or e-mail it to other users. Locate directions to friends in the area by entering addresses, or quickly navigate to any address in your PAC Mate Contacts.

Light, portable and ready to go!

Just plug a CompactFlash card with your maps into the lightweight and portable PAC Mate. **StreetTalk** can be used with a choice of many popular Bluetooth® GPS receivers. With Bluetooth, the receiver can be placed up to 30 feet from the user – on a window sill, the rear deck of a car, or even on a guide dog harness, so you won't be tethered to a lot of cables or special straps.

Maps for the US, Canada, Western Europe, and Australia, with millions of categorized Points of Interest, can be purchased on CDs. Users can select which areas to install on the PAC Mate using ActiveSync.

StreetTalk is an aid to orientation. It is not intended as a substitute for standard mobility aids such as a cane, sighted companion, or guide dog. Please observe ordinary caution when walking, especially when vehicles are present.
