

Fusion provides the power and speed of JAWS for screen reading functionality, coupled with ZoomText, for magnification and visual enhancements for screen viewing ease.

Fusion is flexible enough for individuals with any level of vision impairment. Run JAWS and ZoomText together as “Fusion”; or run JAWS and ZoomText independently.

Getting started is easy and convenient with a single installer and one activation code for all three products: JAWS, ZoomText, and Fusion.

Fusion is the perfect solution for schools, agencies, training centers, and businesses where individuals with vision loss are served. A single installer and one license gives access to both JAWS and ZoomText individually, or together when run as Fusion.

Features

- Magnification up to 60x with screen and cursor enhancements
- Includes scan and read option for image files, PEARL[®], and flatbed scanners
- High-quality speech using Eloquence[®] and Vocalizer[™] Expressive
